SCULPTURE DISCOVERY QUEST CLUES!

See other side to learn how to join the quest

- I'm frozen in time, but images of the past fly by. Come closer to see what once and future technologies in my car windows I exemplify.
- I come with directions, so anyone can assemble me with perfection. Look for my geometric blocks to pick me out from the collection.
- My colors range from bright orange to dusky plum. My 35,000 pound weight makes me the biggest sculpture at the park - and then some!
- My portrait's made of marble, but I'm no Greek god. Find me among the trees with my contemplative façade.
- We may not play any sports but we're still the greatest of all time. With all this stuff on our backs, it might be hard to make the climb.
- We're made up of symbols, not so anatomical. You can spot us from afar, but closer up is optimal.
- I am not a spoon, knife, or plate, but you might find me on a table. I am shiny and on the South Lawn - find me if you're able.
- Where we lead, you never know. Our translucent passageways seem to glow.
